IMPERVIOUS SURFACE CALCULATION SHEET

The Village of Lincolnshire regulates the amount of impervious surfaces covering single-family residential lots. Impervious surface is defined as “any man-made area that alters the natural surface course for or does not allow for the natural rate of absorption or retention of storm water. Such areas may include, but are not limited by reason of exclusion from the following list of examples, roofs, parking and driveway areas, graveled areas, sidewalks and bike paths, paved recreational areas, swimming pools, porches, decks and patios” (Section 6-2-2 of the Lincolnshire Village Code). *Please complete the following calculations to determine the total impervious surface area for the property.*

IMPERVIOUS SURFACE TYPE	IMPERVIOUS SURFACE AREA (sq. ft.)
