Building Permit Application – Village of Lincolnshire, IL – Community & Economic Development

IMPERVIOUS SURFACE CALCULATION SHEET

The Village of Lincolnshire regulates the amount of impervious surfaces covering lots. Impervious surface is defined as “any man-made area that alters the natural surface course for or does not allow for the natural rate of absorption or retention of storm water. Such areas may include, but are not limited by reason of exclusion from the following list of examples, roofs, parking and driveway areas, graveled areas, sidewalks and bike paths, paved recreational areas, swimming pools, porches, decks and patios” (Section 6-2-2 of the Lincolnshire Village Code). *Please complete the following calculations to determine the total impervious surface area for the property.*

The Village’s storm sewer utility fee is based on a property’s impervious surface area. Changes to impervious surface area may result in a change to the monthly storm sewer utility fee. See Section 1-15-8 of the Village Code for the fee rate based on impervious surface area.

IMPERVIOUS SURFACE TYPE	IMPERVIOUS SURFACE AREA (sq. ft.)	
	Existing	Proposed
Building Footprint (including garage)		
Driveway		
Walks		
Decks		
Porches		
Patios		
Swimming Pools		
Detached Storage Structure (shed)

FLOOR AREA RATIO

The following detailed Floor Area Ratio (FAR) information (in the format detailed below) must be shown on the site plan or architectural plans, which are submitted with the building permit application for any new single-family construction or addition project.

	Existing	Proposed
1 st Floor Area		
2 nd Floor Area		
English Basement Area		
Finished Attic Area (height of 5' or more)		
Unfinished Garage Attic Area (height of 5' or more)		
Open 2-Story Element Area (height of 16' or more x 2)		
Total Floor Area (minus 400 square foot garage area bonus):		
<p><u>Floor Area Ratio*:</u></p> <p>_____ ÷ _____ = _____ %</p> <p style="margin-left: 20px;">Total Floor Area Lot Area Floor Area Ratio</p> <p><small>*NOTE: The maximum FAR in all single-family residential zoning districts is 0.25 (25%) of the lot area.</small></p>		

Village Code Definitions (Section 6-2-2):

Floor Area is defined as “the sum of the gross horizontal areas of the several floors of a building, including the English Basement floor, but not including a basement floor, measured from the exterior faces of the exterior walls. The "floor area" of a building shall also include elevator shafts and stairwells at each floor; floor space used for mechanical equipment, except equipment, open or enclosed, located on the roof; penthouses; finished attic space having headroom of five feet (5') or more; unfinished garage attic space, with or without flooring, having headroom of five feet (5') or more from the top of the lowest garage ceiling rafters; provided however that porches and any space devoted to accessory uses off-street parking or loading shall not be included in "floor area, and, in residential zoning districts, the area of a garage shall be included, with the exception that the first 400 square feet of the total garage area shall be excluded. Further, that portion of any open two-story element, which consists of an interior space which has a clear height of sixteen feet (16') or more from the floor elevation, that floor area shall be counted twice in calculating the floor area ratio.”

English Basement is defined as “the portion of a building located partly underground, but having less than half its clear floor-to-ceiling height below the average grade of the adjoining ground and which is finished for living space.”
